## General competencies

### Analysis, planning, structuring
Marie-Anne is able to analyze, structure and plan at both high level (project) and detailed level (tasks).

### Result oriented
As a freelancer/self-employed person, Marie-Anne works result oriented to achieve a good balance between costs, effort and results for the client.

### Environmental awareness
Marie-Anne has the ability to look at things from different perspectives and to pick up signals from the environment in which she works that are not directly expressed.

## Skills

### Programming
Python SQL PHP HTML (S)CSS Javascript

### Technical environment
Power BI MySQL SQL-server Github Joomla (headless) Wordpress Azure

## Languages

Languages:
●●●●●

Engels:
●●●○○

Duits:
●●○○○

## 👤 Profiel

Marie-Anne combines the ability to identify requirements and wishes in the field of information from customers and stakeholders with the skills to quickly analyze what this means for the further (technical) implementation. Marie-Anne has a pragmatic attitude with regard to the way in which projects are realized and can easily adapt to the specific implementation that an organization has made when applying a method. Her work as a self-employed person and the training courses focused on data analysis and AI that she has completed in the meantime, ensure that she is well informed about both old and new technology. Her previous (management) experience at various types of organizations ensures that she moves easily within an organization. She likes to work in teams but can also manage herself very well.
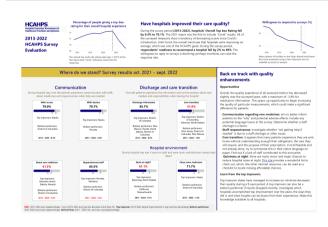

## 💼 Work experience

### Data analist
*emma-design*                                                       **05/2022 - now**

| Project | Description |
|---------|-------------|
| Various Maven Challenges | To maintain my skills, I regularly participate in a data challenge, usually the Maven one. About 150 to 200 people submit their analysis or dashboard based on the assignment and the associated data. Result so far: 3 final places (top 5 and an honorable mention). |

| | |
|---------|-------------|
| Customer assignment | Financial data import tool with Python for use with Dash/Plotly. |

### Webdeveloper, webdesigner (self employed)
*emma-design*                                                       **2005 - now**

With emma-design I have been active as a freelancer for over 18 years. I build simple and more complex websites based on Joomla and Wordpress and also regularly work on assignments for colleagues on components that require more in-depth technical knowledge. In the past 18 years I have:

→ built more than 150 websites with Joomla and Wordpress
→ Created approx. 200 custom themes and templates (layouts) for Joomla and Wordpress, partly as a separate assignment for external relations (design to custom layout), partly for own use.
→ Regularly built custom solutions for clients. Mostly programmed in php/jquery.

| Project | Description |
|---|---|
| Museum Geelvinck organisation and project sites | Design and technical realization of the main site and subsites, including: custom layout (tailwind, alpine.js and php) and custom logic for special situations. |
| Drugsview.nl online learning environment | Knowledge base and training environment for police, government and housing associations. The entire site, including custom search functionality and access structure, was designed by emma-design. |

Het Taalgilde Den Bosch brengt taalcoaches en mensen die beter Nederlands willen leren spreken, bij elkaar

**Implementation manager, senior business consultant**          2001-2005
